Summary

Since 2008 as a Graphic Designer, I've worked in several projects by taking part of every single step of the workflow production, providing me a great experience with a 360° knowledge of what concerns Web Design, Graphic Design and Motion Design.

Looking for challenges that bring new experiences and skills, I'm always willing to discuss and share ideas, each project is an opportunity to learn something new.

In the last years I have improved my knowledge as Saas Product Designer

Main Skills:

- UX and UI, leading and improving new web products;
- Development of websites, from the scratch to its publication;
- Front-end programming;
- Video animation.
